Stopping the Blood Flow

Cuts can happen to anyone at any time.
Would you know how to help someone who had a bleeding cut?
Cut out and glue the correct explanation to each scene of the story.

Joe pressed on the cut to help stop the flow of blood.	Anya placed the pad on the wound and bandaged it carefully.
She checked that the bandage wasn't too tight.	Joe was using a sharp knife to peel an apple.
She put on a pair of disposable gloves.	Anya gave him pillows so he could raise his arm above his heart.
The knife slipped and Joe cut his arm. There was a lot of blood.	Anya went to the bathroom and found a sterile pad and bandage.
