Airway and Breathing

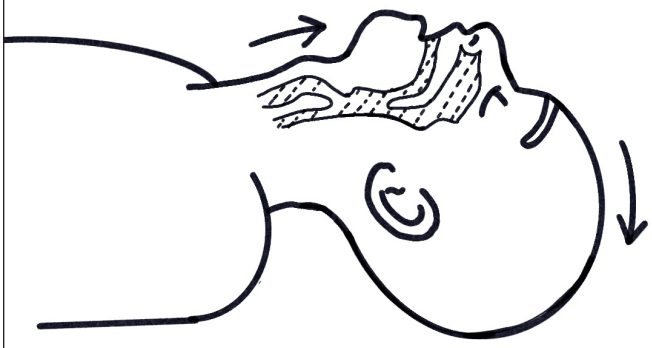

An unconscious person is not able to move, cough or control any of their muscles - including their tongue. You need to make sure the airway is clear

1. Use the words in the box to write a sentence describing how to check an airway for blockages.

jaw	pull	foreign	material	mouth

2. Look at the two pictures below. Label them and describe what is happening in each.

3. Colour the correct word in each word pair.

We can check if a person is breathing by looking | asking to see if their chest is rising | broken, tapping | feeling their abdomen and listening for breath at the casualty's chest | mouth and nose.
